Suite 428  
Boca Raton, FL 33486

Dear Susan;

As we near the completion of the St. Joseph's Assisted Living Center from bare ground to the beautiful building, from the exterior to the interior design that stands on it today, I wanted to express our appreciation for the fantastic job that the Wells Design Group did.

As it often happens with undertaking projects of this size we encountered many "challenges" along the way but with you and your teams' consistent availability to us during the construction phase of the project, we were able to resolve the "challenges" quickly. Which I am sure you are aware of "time" plays a major role in the construction of such a large facility. You became a vital link between our architect, general contractor and me.

As we began the design concept of the interior furnishings your team and your attention to detail was non-other then remarkable. As the design concept became more then fabric swatches, samples of flooring, and pictures of the furniture we were able to envision what the beautifully decorated center that would be to come in the near future.

We anticipate that once our facility is open to our staff and eventually to our residents that there will only be "high praises" for the beautiful surroundings.

St. Joseph's would be more then delighted to recommend you and your team to others who wish to make what could be a very trying, difficult process into one that by all accounts would proceed along effortlessly.

Sincerely yours,

Joanne Soltau  
Director/Owner
